Kenny Glick knows what he wants in his bikes, and Dave Dupor of DD Custom Cycles does the interpreting for him. Kenny's latest Street Glide runs a 23-inch wheel and full custom metal work. The Granite Gray and flat black paint job was shot by MNK Custom Works, which works well with the bike's conservative styling. July No. 21, page 68

**ROAD IRON**  
**ANNUAL**  
**2013**

As long as we are talking about conservative bikes, we might as well feature Justin Ombs' super cool Road Glide. The fenders, bags, and bars got the once over and the paint got a real royal treatment. The Crimson Red Sunglow and Black Onyx colors are factory H-D laid on by BC Auto Body in Mesa, Arizona. August No. 22, page 74
